The prior art fails to teach an ordered planar array comprising several different particle types with different ligands attached to different particle types, said particles up to 10 microns in diameter, wherein different particle types are randomly distributed throughout the array, and said particles are encoded with a characteristic that permits identification of the ligand or ligands attached thereto and permits distinguishing the individual particles including distinguishing different particles from each other, and wherein said particles are in a planar defined area on the surface of a substrate and are affixed to said substrate such that said particles *form planar hexagonal crystalline configurations*.

Art Unit: 1641

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
